

ESCAPING THE CODE

Five mega-corporations control digital life, using stolen data to power bots that manipulate, and replace human behavior. Null, the freedom hackers erase identities to escape. From the shadows, they breach firewalls to free trapped data and fragments of humanity. The deeper they go, the harder the system fights. Corporations evolve, and the code starts to feel alive.

Deadcode is a 5 column, 5 row hacked slot that comes with a global multiplier, wilds, symbol removal, symbol upgrade, grid expansion, a bonus, and a super bonus, all packed into a potential of 5,000x bet.

X-iter™

X-iter™ allows players to jump straight into the action with 5 different game modes ranging from a 2.5x bet with more than four times the chance to trigger the bonus, to a 250x bet super bonus.

DEADCODE

BONUS

Three bonus symbols trigger the Bonus game. Grid size, Global Multiplier, and Collector meters are persistent between drops. If one of the three Bonus symbols is a Super Bonus symbol, the Super Bonus game is triggered, where each Bonus drop guarantees 1 to 5 Subroutine features.

COLLECTORS

The grid has a Collector per column, each linked to a Subroutine feature. Collectors fill when a collecting win matches their type. Wilds and Kickers count towards any Collector.

SUBROUTINE FEATURES

There are 5 Subroutine features which triggers when its Collector meter is full.

THE BREACH

The Breach feature triggers randomly at the end of a game round, replacing all non-winning payout symbols with new ones.

GLOBAL MULTIPLIER

All wins are multiplied by the Global Multiplier. Each winning cascade increases the Global Multiplier by +1.
