

## MOMMY'S VERY ANGRY

The success of the Pirot's show lasted well over 10 000 days before their fuel ran out. Eager to recharge their feathers, the Pirot's went on full recon and identified what seemed to be some barrels of sweet rum in an unknown location not too far away.

Pirot's 2 a 6x6 teathy slot that comes with the CollectR™ mechanic, an expanding game grid, symbol upgrades, symbol transformations, wilds, coin wins, a bonus game as well as a super bonus game – all packed into a potential 10,000x bet.

**X-iter™**

X-iter™ allows players to jump straight into the action with 5 different game modes ranging from a 3x bet with more than three times the chance to trigger the bonus to a 500x bet Super Bonus played on the maximum grid with upgrade symbols that always upgrade all amber symbols.

## SYMBOL COLLECTION

The birds move and collect amber symbols of their own color to generate wins as well as feature symbols. All collected amber symbols count in the feature meter. A full meter awards three chests filled with random feature symbols.

The amber symbols can upgrade up to 7 times, increasing the payout at each step.

Three bonus symbols collected during a game round trigger the bonus. The grid size, the progress on the feature meter, the payout level of the amber symbols, and the collection of additional bonus symbols are all persistent during the bonus game.

## FEATURE SYMBOLS

There are eight different feature symbols ranging from instant coin wins, symbol upgrades, wilds, game grid expansions, redrops, symbol transformations, popcorn and bonus symbols.

## POPCORN

A collected popcorn symbol fills empty symbol positions with popcorn allowing the birds to cross empty spaces one time each to reach additional symbols.

## Recommended size and ratio for desktop browsers

For the optimal gaming experience, ELK Studios recommend launching the game in 1600x900 resolution. If scaling is required, use 16:9 ratio.

## Technology

ELK games uses state of the art web technologies including support for canvas and WebGL. The client detects the capabilities of the device regardless if the player is running on a desktop, tablet or mobile.

The game client will then optimize the gaming experience based on those parameters.
